**WELLS FARGO**
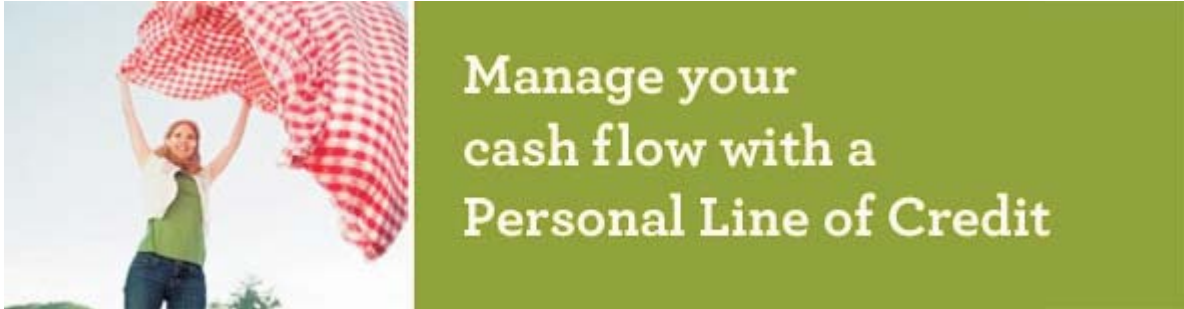

## Personal Line of Credit

Manage your cash flow with a Personal Line of Credit

A Wells Fargo Personal Line of Credit offers a convenient way to help you deal with changes in your monthly cash flow.* You can also use it to fund major purchases, pay property taxes, or to consolidate debt.

**Why get a Personal Line of Credit?**

- Handle varying income and expenses
- Access a renewable source of funds, now and in the future
- Get a quick credit decision, usually in just one to two business days

**Convenient access to funds**

It's easy to access your Personal Line of Credit at any time. Just transfer funds from your line of credit to your Wells Fargo checking or savings account – online, by phone, or at any Wells Fargo location.

**An easy way to borrow**

- No collateral
- No balance transfer or cash advance fees
- Low minimum payments
- Pay in full to reduce interest costs

**Call us to learn more about a Personal Line of Credit**

Call one of our bankers any time to learn about your options: 1-888-667-5250.

* Subject to application, credit qualification and income verification. The Annual Percentage Rate (APR) may range from x.xx% to xx.xx%. The stated range is accurate as of [date TBD]. Interest rates are variable and subject to change. $25 annual fee applies

**About**

Established in 2006 and headquartered in Boulder, Colorado, Computer Wizz is the top-rated business IT support and computer repair group serving Colorado and southern Wyoming. Our customers include corporations and non-profits, as well as sole proprietorships and individual users.

We support technologies ranging from smartphones and tablets to network servers, security appliances and phone systems. Although we do provide service onsite, much of our work can be performed remotely. We can work with you by contract or on an as-needed basis.

Whatever the size of your organization, you can count on Computer Wizz to perform all the functions of an in-house IT department – at a fraction of the cost.
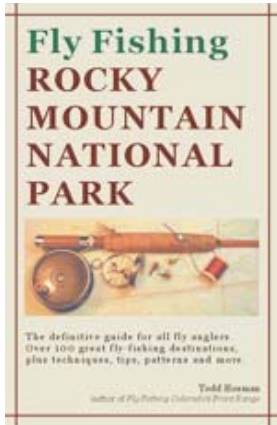

**First-rate customer service**

While we're passionate about technology, we're just as dedicated to the pursuit of perfect customer service. For instance, Computer Wizz receives high ratings both from the Better Business Bureau and our own customers, whose referrals account for much of our new business. Also, since our company's founding, our customer retention rate measures about 99.9 percent.

Of course, our technical staff contributes greatly to the success of Computer Wizz customer service. They are not only trained in a wide range of technologies, they specialize in person-to-person communication. In other words, they speak your language and share your concerns: They know how to listen and understand.

In fact, the first mission of a Computer Wizz engineer is to understand precisely how you use digital technology to manage your business and achieve your goals. That's one more way Computer Wizz ensures comprehensive technical assistance – tailored to your unique requirements.

### Payment and Shipping Info

Books bought from Streamside Press typically ship by U.S. Postal Service Priority Mail (with delivery confirmation) or similar service. On request, purchased items will be autographed by the author. Credit card and PayPal payments are processed securely online by PayPal.

## INOVONICS ECHOSTREAM:
# NEW HORIZONS IN RF TECHNOLOGY

## ABOUT ECHOSTREAM
Versatile and cost-effective, EchoStream is an expandable Radio Frequency (RF) system of one- and two-way remotes that allows coverage of large campuses and industrial buildings. EchoStream can also provide the RF communications link to a variety of other signal and control applications.

## KEY FEATURES
Featuring battery- or line-powered remotes and 2-mile range, EchoStream supports 2-kbps data rates and 200-byte data packets. Spread spectrum, frequency-hopping technology delivers exceptionally reliable performance. Highly scalable and compatible with 900 MHz and 868 MHz applications, EchoStream accommodates both time-based and event-based transmissions. Adaptable interfaces allow easy connection to other devices.

EchoStream is a product of Inovonics Wireless Corporation. Since the company's foundation in 1986, Inovonics has shipped more than two million RF devices. Inovonics focuses exclusively on the design and manufacture of premise-based wireless products.

## HOW ECHOSTREAM WORKS
An EchoStream wireless system consists of three main components: (1) the OEM application controller, (2) optional repeaters and (3) several types of remote devices. The OEM application controller, which provides a user interface to the application, integrates with a network controller. The network controller manages RF activity and passes messages between the RF system and the OEM application controller.

## ECHOSTREAM SCALABILITY, VERSATILITY
For RF coverage of larger sites, you can add intelligent repeaters to the system, creating a self-organizing microcellular network. The network receives, amplifies and forwards messages to and from remote devices. Remote devices differ according to communication capability (one-way or two-way) and power source (primary battery or line-powered).

You can also add thousands of transmitters to build a scalable, intelligent and self-organizing repeater network. The network receives and sends information, collecting input and controlling remote devices. In addition, the network identifies and recalls the most efficient path for routing messages to and from remote devices.
